

YetiCare

***Smart technology for individuals
with special needs***

Combination of

- *a unique, giant Android tablet, the Yetitablet*
- *a user interface designed for individuals with special needs*
- *an application package to rehabilitate and to entertain*

We developed YetiCare based on the experience from our pilot projects with several health care organisations in the Nordics.

YetiCare user interface – smart technology for everybody!

YetiCare user interface enables individuals with special needs to use Yetitablet independently.

The sheer size of the screen makes a big difference for a user with visual impairment or fine motor challenges.

The icons on the front screen can be enlarged and locked so that no content will be moved or deleted by mistake.

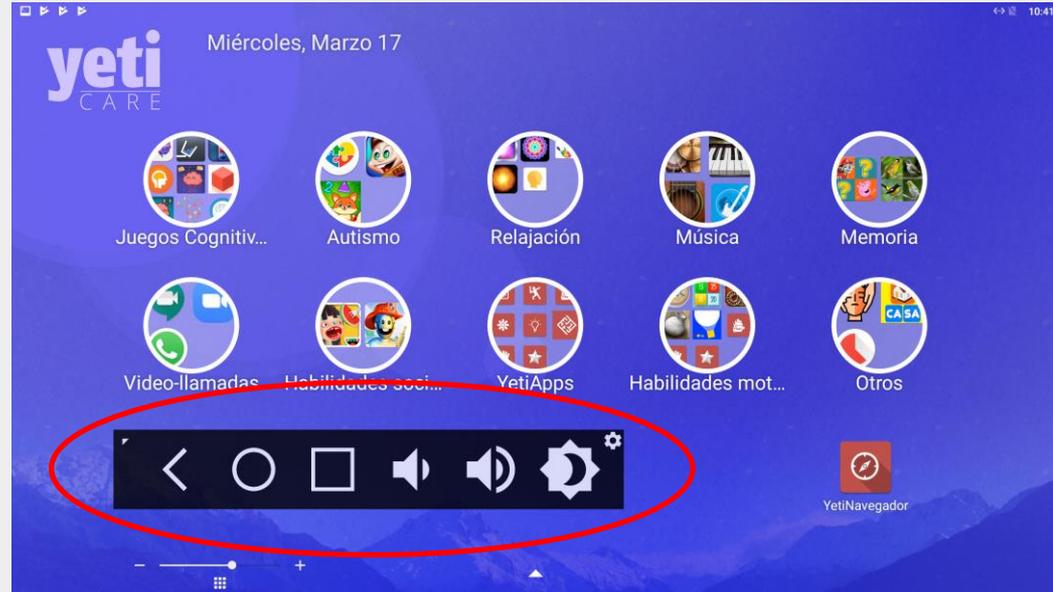

YetiCare Navibar- only when you need it

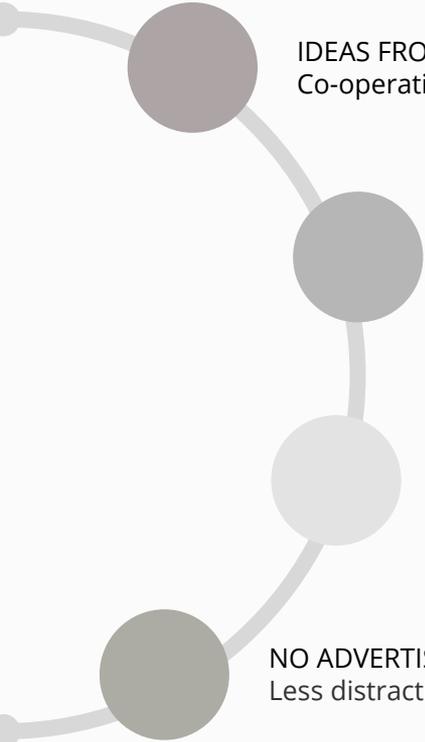

The floating YetiCare Navibar prevents the user from making accidental clicks.

It can be moved across the screen and hidden completely.

All this helps the user to concentrate on the task at hand.

YetiCare Apps – designed for individuals with special needs

IDEAS FROM OUR PARTNERS AND CUSTOMERS
Co-operation and testing play a big part.

DESIGNED FOR GROUP ACTIVITIES
Social interaction is enhanced by games designed for multiple players.

OPTIMIZED FOR THE BIG SCREEN OF THE YETITABLET
Apps that utilize the whole screen area develop motor skills effectively.

NO ADVERTISING
Less distractions in a safe environment.

YetiCare contains almost 20 YetiApps. We develop new apps constantly and they will be added automatically onto your YetiTablet with our regular software updates.

In addition to YetiApps, you have access to all content or apps that are available for any Android tablet or phone.

YetiCare Apps – encouragement for independent use

YetiCalendar

YetiCalendar supports your daily schedules and routines.

It is an easy-to-use picture-calendar. It enables to visualize the events taking place in the upcoming day(s) and supports structuring time.

YetiPhysical

YetiPhysical is a set of games to promote physical activity and coordination training.

These target practice games are fun to play by throwing objects at the targets on the Yetitablet. You can use pads, soft rubber balls or fabric cloths for throwing.

YetiSkills

YetiSkills is a set of games to support coordination and fine motor skills and to promote cooperation and social skills.

While training together you will have fun sinking ships, shape-sorting or lost in a maze!

YetiBrain

YetiBrain challenges your memory, wit and response capability with a wide selection of fun games.

You will find classic brain-teasers such as Hangman, Memory and Trivia, but also new and fun games to activate your brain cells!

YetiSensory

YetiSensory apps stimulate you by using touch, images and sounds in a soothing way.

You can fully submerge in a world full of natural wonders and relaxation or write in the sand on a beach.

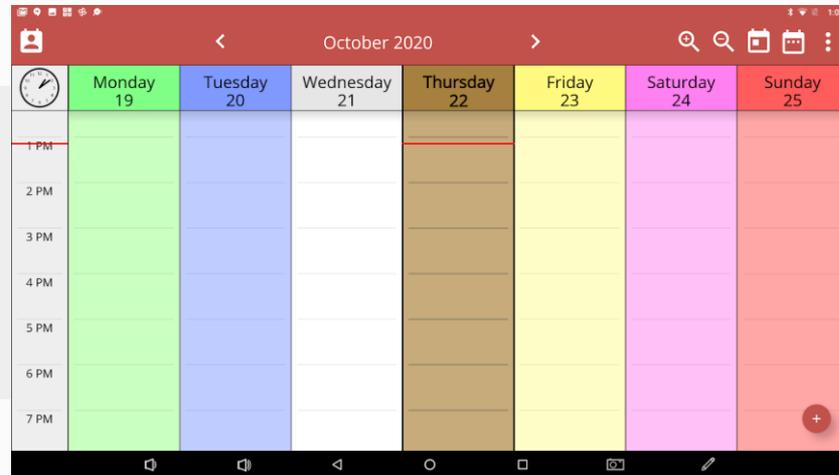

YetiCalendar

YetiCalendar

YetiCalendar supports the daily schedules and routines for individuals, families and groups.

It is an easy-to-use picture-calendar. It enables to visualize the events taking place in the upcoming day(s) and supports structuring time.

The events are generated by drag-and-drop and can be chosen either from a selection of pre-set events or can be generated from your own pictures.

- Multiple participants can be added to each event.
- The calendar can be stored either locally on the device or set up with a Google account.
- Notifications pop up on your device at the start of an event.

YetiPhysical

YetiPhysical

YetiPhysical is a set of games to promote physical activity and coordination training.

These target practice games are fun to play by throwing objects at the targets on the Yetitablet. You can use pads, soft rubber balls or fabric cloths for throwing.

In **'Tin cans'** throw the soft rubber balls or other similar materials to the tins like a real bowling game.

For **'Darts'** throw soft rubber balls, pads or other similar materials to the target like in a real dart game.

In **'Rings'** throw the soft rubber balls or other similar materials to the center of the rings.

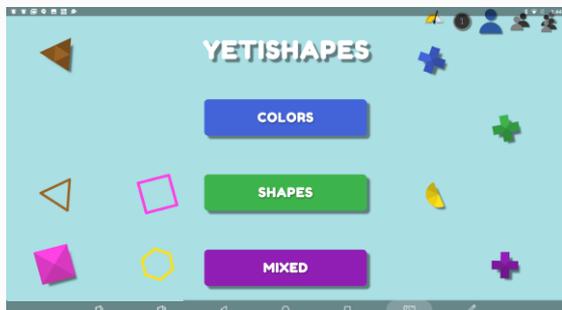

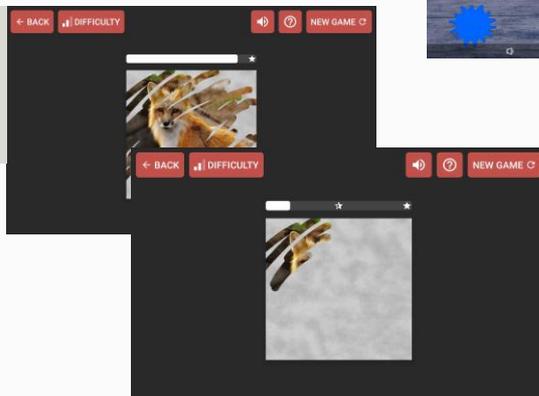

YetiSkills

YetiSkills

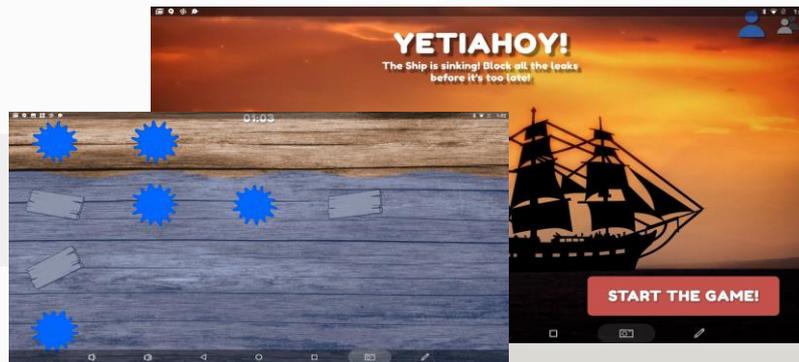

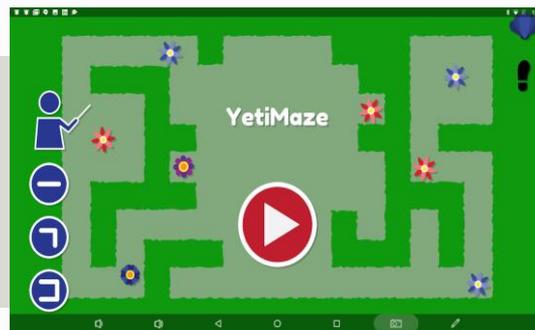

YetiSkills is a set of games to support coordination and fine motor skills and to promote cooperation and social interaction.

YetiScratch is a game to identify or recognize the image by scratching the covered coating.

YetiShapes is the classic shape-sorting toy made digital. The shapes or colors need to be dragged to their respective outline. The difficulty level is adjustable and you can split the screen for 2 or 4 players.

You need fine motor skills in order to get through the YetiMaze and to collect the objects on your path. The objects, as well as visual and audio stimuli keep you engaged throughout the game. The difficulty of the game adjusts based on the performance and mistakes made.

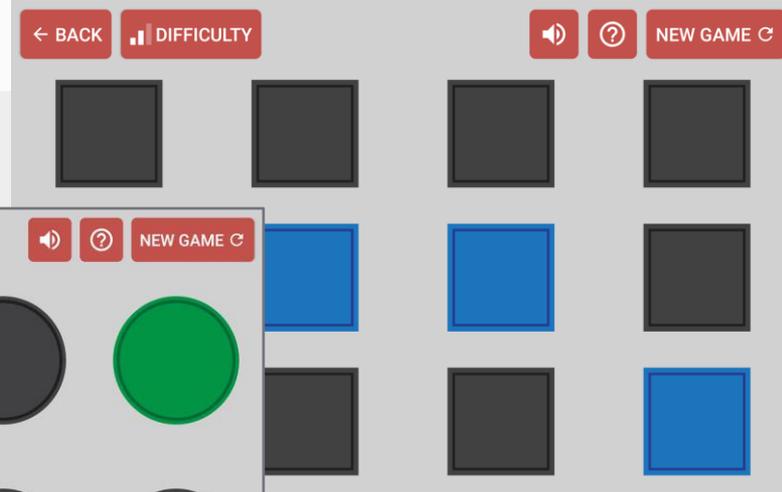

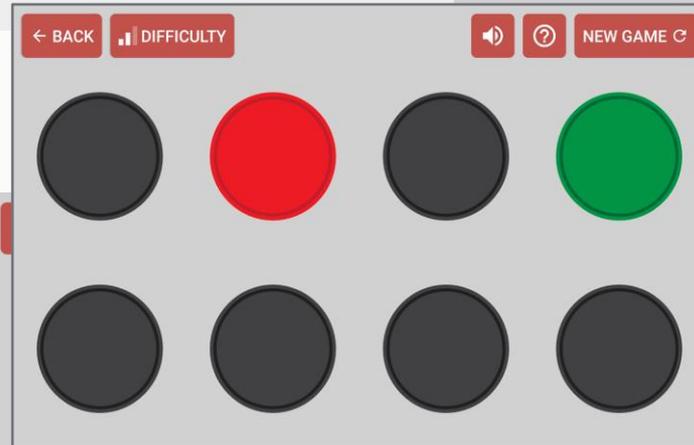

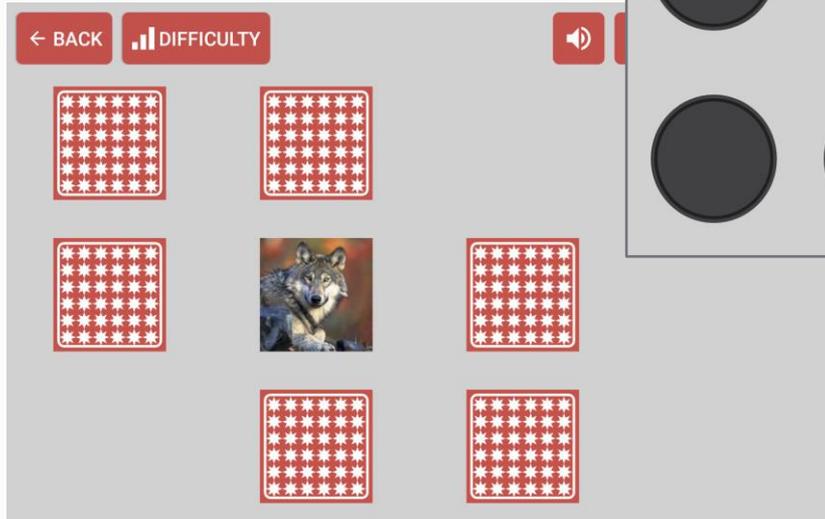

In YetiAhoy your goal is to save the ship from sinking by fixing the leaks. You need to long-press the holes that appear in the hull.

YetiBrain - Memory

YetiBrain

YetiBrain challenges your memory, wit and response capability with a wide selection of fun games.

Memory training

'Match the Pairs' is a classic memory where you try to flip over the cards with the same image.

In 'Follow the Sequence' and 'Memory Blocks' you need to remember which blocks or circles were lit up and tap according to game instructions.

YetiBrain – Words & Wit

YetiBrain

YetiBrain challenges your memory, wit and response capability with a wide selection of fun games.

← BACK DIFFICULTY

What is the primary ingredient for hummus?

- a) Avocado

SCORE: 117 ROUND: 1/5

Choose the color which the underlying word is written in

BROWN YELLOW PURPLE

Test your wit

Play the classic Hangman with the Yeti-version 'Word Guess' or test your knowledge in 'YetiTrivia'. 'Color Word' challenges your logic in combining the right word with the right color. 'Word Search' offers you a challenge to find words in a maze of letters.

YetiBrain – Spatial challenges

YetiBrain

YetiBrain challenges your memory, wit and response capability with a wide selection of fun games.

The collage features five screenshots of different games from the YetiBrain app:

- Color Wheel:** A circular wheel divided into segments of red, green, and blue. A red ball is positioned on the wheel. The number '8' is displayed in the center.
- Sliding Blocks:** A grid-based puzzle with several black blocks and one red block. A red arrow indicates the direction of movement.
- Line Puzzle:** A 3x3 grid of dots with a line drawn through them, forming a right-angled triangle. A question mark icon is visible.
- Continue the Pattern:** A sequence of colored shapes: a red circle, a blue triangle, a green square, a red circle, and a blue triangle. A question mark icon is visible.
- Spatial Training:** A large image of a deer on the left and a 3x3 grid of smaller images on the right, each showing a different part of the deer's head and antlers.

Spatial Training

In 'Color Wheel' try to match the color of the wheel and the ball.

In 'Sliding Blocks' slide the red block to the exit and in 'Line Puzzle' copy the line on the left.

'Continue the Pattern' tests your logical reasoning, how would you continue the pattern?

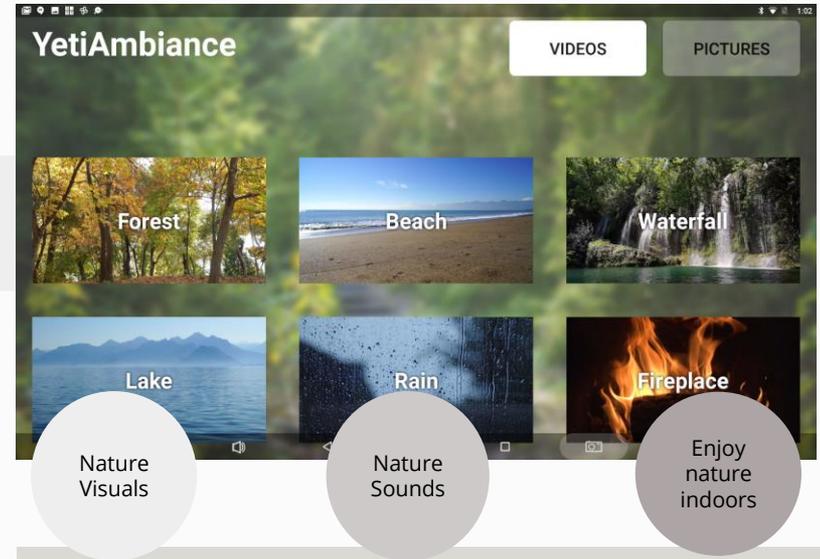

YetiSensory

YetiSensory

YetiSensory apps stimulate you by using touch, images and sounds in a soothing way.

YetiSand invites you to draw on the sandy beach freely with simulated sounds when you touch the screen. You can use starfishes, conches and shells for decoration.

YetiAmbiance offers high-resolution pictures or videos along with sound. You can fully submerge in a world full of natural wonders and relaxation.
